CYBERSECURITY FOR YOU.

Lock the Doors Batten the Hatches

By James Cooke, Ian Apelgren

<u>User Manual</u>

Installation

Before beginning the installation process make sure to have a Java Development Kit and Virtual Machine installed.

Java Development Kit:
https://www.oracle.com/java/technologies/downloads/#jdk19-windows

Java Virtual Machine: https://www.java.com/en/download/

Please restart your machine after installing these.

1) Create a new folder on your Desktop.

2) Open the terminal/command prompt and navigate to the folder you just created:

  cd ./Desktop./*YOURFOLDERNAMEHERE*

3) Once inside the directory enter:

  git clone https://github.com/cookejm1/LockDoorsBattenHatchesGUI
  You will now have a copy of the source files.

4) Navigate to the source files via:

  cd ./LockTheDoorsBattenTheHatches/src/com/ltdbth/gui

5) Once inside enter:

  javac *.java
  This shall compile all source files. Ignore the two warnings.

6) Enter:

 java login
  And the application will launch.

Using Lock The Doors Batten The Hatches

- **Lock The Doors Batten The Hatches provides an easily navigable application with many buttons and labels.**

- **When launching Lock The Doors Batten The Hatches with "java login" you will be greeted by this page:**

- **The current version has only local login and user registration functionality so press "Offline Mode" to launch into the main splash screen.**

- From this screen you can explore and learn all the different tools that can be housed within Lock The Doors Batten The Hatches.

- Each tool has an install button and launch button.

- IP Config, MAC Address Lookup/Finder and Advanced Network Tools for windows require no other installations.

- On both Windows and MAC operating systems tools must be installed in the default directory to be launched through the "Launch" button on each page. For windows this is "C:/Program Files" and for MAC "Applications".
